### REVISED NOTICE OF PROPOSED AWARD

## Alternative and Renewable Fuel and Vehicle Technology Program

# Grant Solicitation GFO-17-607 School Bus Replacement for California Public School Districts, County Offices of Education, and Joint Power Authorities February 6, 2019

On May 31, 2018, the California Energy Commission (Energy Commission) released a Grant Solicitation and Application Package entitled "School Bus Replacement for California Public School Districts, County Offices of Education, and Joint Power Authorities" under the Clean Energy Job Creation Program and the Alternative and Renewable Fuel and Vehicle Technology Program (ARFVTP). The ARFVTP component of this grant solicitation was an offer to fund projects that replace the oldest diesel school buses in California with compressed natural gas (CNG) buses and to provide infrastructure to support both CNG and electric vehicle (EV) school buses awarded under this solicitation. Every application underwent administrative and technical screening. Applications passing the screening criteria were then reviewed and scored. Each individual school bus requested for replacement was evaluated on three criteria: the age of the school bus (70%), benefits to disadvantaged communities (10%), and applicant's percentage of students on free and reduced priced meals as reported in the 2017-18 First Principal Apportionment (20%).

The grant solicitation announced that there is a total of \$6.1 million available from ARFVTP for CNG agreements resulting from this solicitation and that the Energy Commission, at its sole discretion, reserves the right to increase or reduce the amount of funds available. CNG school bus funding awardees will be required to procure the school bus using the applicant's established procurement procedures while adhering to all applicable state and local laws and the terms and conditions of the agreement resulting from this solicitation.

On November 29, 2018, the Energy Commission issued a Notice of Proposed Award (NOPA) identifying each applicant selected for and recommended for ARFVTP funding by Energy Commission staff and included the score as well as the amount of recommended funding for the replacement CNG school bus and related CNG infrastructure.

The attached table, "Revised Notice of Proposed Award," reflects a budget reallocation of an additional \$320,529 for CNG school bus grants, increasing the original allocation from \$3,700,000 million to \$4,020,529. In addition, several buses were withdrawn from applications and one bus dropped in ranking due to incorrect application information.

This is reflected in the attached table.

This notice is being mailed to all parties who submitted an application to this solicitation and is also posted on the Energy Commission's website at: <a href="http://www.energy.ca.gov/contracts/index.html">http://www.energy.ca.gov/contracts/index.html</a>.

Funding of proposed projects resulting from this solicitation is contingent upon the approval of these projects at a publicly noticed Energy Commission Business Meeting and execution of a grant agreement.

Questions should be directed to: Crystal Presley-Willis
